Full Description : (Specification of co-operation request / offer)

A Hungarian IT company with 8 years experience in building intelligent (meta) search solutions combining the above mentioned technologies is looking for distributors and offers subcontracting activities. Beside search solutions the company has developed an English language medical and health knowledge base that recognises thousands of medical phrases, provides definitions for them and related phrases for direct information and advanced research purposes. The software combines data only from trusted medical online sources and creates a higher level, semantically associated knowledge base. The company is interested in the sale of the technology to an exclusive partner, e.g. content provider or enterprise search vendor.

Main advantages the company could offer to a potential partner

This knowledge base can be a highly valuable feature of a health related (online or offline) software solution or website. It gives reliable and clearly organized, immediate information to users, this way enhancing the position of your product by providing an intelligent question answering service.

### **Partner Information**

Type of Partners

Company

Field of Activities

Services
